

Laburnum anagyroides

(Golden Chain Tree)

Beautiful and cheerful small tree with a wisteria like hanging yellow flowers. The seed pods are toxic, don't let children play with it. The tree is truly incredible in full bloom. It is difficult to grow and should be grown in a spot protected from full day sun, with very well-drained, alkaline pH (only above 7.00) soil and high organic matter. It will perform much better in gardens that are not hot in the summer, including having more long-lasting blossoms
