

Jasminum polyanthum

(Winter jasmine, pink jasmine)

Fast growing twining vine with glossy, compound leaves and very fragrant white flowers in late winter and spring, preceded by delicate pink buds. In warmer climates, pink jasmine can be used freely to cover walls and high fences, to grow on arbors, or train up any surface where a verdant cover is desirable. This is especially nice grown around windows, where it can provide a visual frame and where its heavenly scent can waft inside. It can escape from cultivation in subtropical climates and is considered an invasive plant.
