Coriandrum sativum

(Coriander, cilantro)

Coreander is a Mediterranean fast growing annual, highly used in cooking as a herb or spice. It's part of many cuisines in europe, asia, and latin america. Its leaves have a strong taste that is either loved or hated by people.

It has parsley-like leaves, and is ready to be harvested 4 to 7 weeks after sowing.

This easy to grow herb do best in well drained soil with average fertility, and in full to partial sun.
