Verbena tenuisecta

(Moss Mock Vervain, South American mock vervain)

Verbena tenuisecta is a tender perennial but usally used as an annual. It has a green decidious folliage and purple flowers. This plant is usually used as a trailing plant.

Tolerates heat and drought, and needs well drained soil, and full sun to partial shade to grow in a healthy way.

Landscape Information

French Name: Verveine

Pronounciation: ver-BEE-nuh ten-yoo-ee-

SEK-tuh

Plant Type: Shrub, Groundcover

Origin: South America

Heat Zones: 9, 10, 11, 12, 13, 14, 15 **Hardiness Zones:** 9, 10, 11, 12, 13

Uses: Border Plant, Container, Ground cover,

Rock Garden

Size/Shape

Growth Rate: Fast **Tree Shape:** Spreading

Height at Maturity: Less than 0.5 m

Spread at Maturity: 0.5 to 1 meter, 1 to 1.5

meters

Horticulture Management

Tolerance

Heat Tolerant: Yes **Drought Tolerant:** Yes

Requirements

Soil Requirements: Loam, Sand

Soil Ph Requirements: Acidic, Neutral, Alkaline

Water Requirements: Moderate, Low

Light Requirements: Full, Part

Management

Invasive Potential: Yes

Pruning Requirement: Little needed, to develop a strong structure

Edible Parts:

Plant Propagations: Seed, Cutting, Division
