Alpinia zerumbet

(Shell Ginger, Variegated Shell Ginger)

Shell ginger is a tall herbaceous perennial that is used in the landscape for its attractive foliage and shell-like flowers. It can grow up to 2.5 meters or more in ideal conditions. The leaves are very long and strikingly variegated with irregular stripes of green and yellow and have a distinct, spicy fragrance. This ginger puts out delicate flowers resembling White Sea shells, tipped pink with a red and yellow throat. It flowers during spring and summer, but will flower intermittently year round in warmer areas. It flowers best if give a few hours of direct sun, but will happily grow even in partial shade.

The rhizome, fruits and seeds have medical uses.
