

Hoya carnosa

(Porcelain Flower, Wax Flower)

The Porcelain Flower comes with a cluster of flowers forming a dome; this evergreen climber is intensely fragrant due to its flowers. Native to Southern Asia and Australia, Hoya carnosa has been known to be used as a greenhouse and conservatory plant.

Where it is hardy, this clinging vine is perfect for use as a specimen for a garden wall or trellis. In colder climates, it can make an excellent house (or greenhouse) plant.
