## **Chamaerops humilis**

## (European Fan Palm)

This small, multi-stemmed, hardy palm is the only one native to Europe, and is hardier than most palms. The curved, clumping, short trunks and gray-green, fan-shaped leaves, borne thickly in a bushy head, make a stunning sculptural element in a garden or patio containers. The fine-textured fronds make the palm stand out from other plants in the landscape. Leaf color on individual plants ranges from light green through silver. Although growth rate is slow, it is well worth the wait since even small palnts will stand out nicely in almost any landscape. By removing suckers from the base of the main trunk, this slightly salt-tolerant palm may also be trained as a single-trunked palm. Since the leaf stalks are spiny, Fan Palm may also be used as a single-trunked palm. Since the leaf stalks are spiny, Fan Palm may also be used as a barrier. It makes a nice accent plant in a shrub border or in a low-growing groundcover. It can also be planted several feet apart in a mass on a large-scale landscape forming a fine-textured accent area. Growing best in moist rich soil, it is drought- and wind-resistant, and established plants will survive temperatures to 10-degrees F. or below, in full sun or light shade. Plants grow very slowly in the shade.

### **Landscape Information**

French Name: Palmier nain, Faux doum

**Pronounciation:** kuh-MEE-rops HEW-mih-liss

**Plant Type:** Palm

**Origin:** South Europe, spain, Portugal. Morocco

**Heat Zones:** 10, 11, 12, 13, 14, 15, 16 **Hardiness Zones:** 8, 9, 10, 11, 12, 13

**Uses:** Screen, Specimen, Indoor, Container,

Edible, Wildlife

## Size/Shape

Growth Rate: Slow Tree Shape: oval

Canopy Symmetry: Irregular
Canopy Density: Medium
Canopy Texture: Coarse
Height at Maturity: 3 to 5 m

Spread at Maturity: 3 to 5 meters

Time to Ultimate Height: 10 to 20 Years

## **Chamaerops humilis**

(European Fan Palm)

Flower Image

### **Botanical Description**

## **Foliage**

Leaf Arrangement: Spiral
Leaf Venation: Palmate
Leaf Persistance: Evergreen

Leaf Type: Simple
Leaf Blade: 50 - 80
Leaf Shape: Fan
Leaf Margins: Lobate
Leaf Textures: Rough
Leaf Scent: No Fragance
Color(growing season): Green
Color(changing season): Green

#### **Flower**

**Flower Showiness:** False **Flower Size Range:** 7 - 10

Flower Type: Spike

Flower Sexuality: Monoecious (Bisexual)

Flower Scent: No Fragance

Flower Color: Yellow Seasons: Spring

#### Trunk

Trunk Has Crownshaft: False

Trunk Susceptibility to Breakage: Suspected

to breakage

Number of Trunks: Multi-Trunked

Trunk Esthetic Values: Showy, Rough Texture

#### Fruit

Fruit Type: Drupe

Fruit Showiness: False Fruit Size Range: 0 - 1.5 Fruit Colors: Orange

Seasons: Spring

Leaf Image

### **Horticulture Management**

#### **Tolerance**

Frost Tolerant: Yes
Heat Tolerant: Yes
Drought Tolerant: Yes
Salt Tolerance: Good

### Requirements

Soil Requirements: Loam, Sand

Soil Ph Requirements: Acidic, Neutral, Alkaline

Water Requirements: Low Light Requirements: Full, Part

### Management

Toxity: No

Invasive Potential: No

Susceptibility to Pests and Diseases: No

Mowing Height: 5 - 7 cm

Pruning Requirement: No pruning at all

Fruit/ Leaves/ Flowers litter: Yes

Surface Rooting: No Life Span: 25-50 years Edible Parts: Fruit

Pests: Mites, Nematodes

Plant Propagations: Seed, Offset
