

Jasminum angulare

(South African Jasmine, angular jasmine)

This type of jasmine is native to Africa, and can be either a shrub or a vine. It blooms during summer and early fall. The flower is white, and has a star shape.

Grows well in fertile, moist but well drained soil, in full or part sun. In case of very hot summer, shade could be beneficial.

Horticulture Management

Tolerance

Frost Tolerant: No

Heat Tolerant: Yes

Requirements

Soil Requirements: Clay, Loam, Sand

Soil Ph Requirements: Acidic, Neutral, Alkaline

Water Requirements: Moderate

Light Requirements: Full, Part

Management

Invasive Potential: No

Susceptibility to Pests and Diseases: No

Pruning Requirement: Little needed, to develop a strong structure

Edible Parts: None

Pests: Aphids, Mealy-Bug

Plant Propagations: Cutting, Layering
