

Phoenix roebelenii

(Pygmy Date Palm, Miniature date palm)

Phoenix roebelenii is one of the finest dwarf palms, slowly reaching a maximum of 3 meters in height. It has a single trunk topped with dense arching 60-80 cm leaves. The flowers are hidden by the leaf crown. This palm should only be grown in frost-free areas in sun or shade on well-drained soils and should be regularly watered. It has some salt tolerance, surviving on the inland side of coastal condominiums.
